

Will Japan start a large-scale energy storage facility in 2024?

Here, we will delve into our path taken to launch a completely new business and start operation of the first large-scale energy storage facility in Japan in 2024, as well as the challenges and future prospects on the front line. Joined the Company in 2013.

What is Japan's first energy storage project?

In 2015, we started Japan's first demonstration project covering energy storage connected to the power grid in the Koshikishima, Satsumasendai City, Kagoshima. This project is still operating in a stable manner today. One feature of our grid energy storage system is that it utilizes reused batteries from EVs.

Can EV batteries be reused in Japan?

One feature of our grid energy storage system is that it utilizes reused batteries from EVs. Although the penetration rate of EVs in Japan is still only about 1%, the Japanese government aims for 100% of all new passenger car sales to be EVs by 2035. This, at the same time, means that more batteries will be discarded.

Can energy storage improve the reliability of Japan's grid?

"As Japan accelerates the development of renewable energy projects to meet its decarbonization goals, energy storage will have a crucial role to play in enhancing the reliability of the Japanese grid," said Ryan Chua, Senior Managing Director at Stonepeak.

Why is Sumitomo launching a large-scale energy storage platform?

One of the main reasons is the insufficient capacity of transmission lines. In response to this issue, Sumitomo Corporation aims to expand its business of storing energy nationwide in Japan by developing a large-scale energy storage platform that can compensate for this lack of transmission line capacity.

What is a battery energy storage system?

The battery energy storage system (output: 1 MW, capacity: 3 MWh) is jointly developed with project partners by combining the vehicle batteries, control parts and technology used in Toyota Motor Corporation EVs, with the grid connection expertise of Tokyo Electric Power Company Holdings, Inc.

On 18 February, Sunwoda Energy, a leading full-chain energy storage solution provider, showcased its comprehensive portfolio of commercial, industrial, and utility-scale energy storage solutions at the Energy Storage Summit 2025. Positioning mobile energy storage as the missing link in Europe's clean energy transition, Sunwoda Energy's Chief ...

Find the top Mobile Energy Storage suppliers & manufacturers from a list including Aquion Energy, Inc, Northvolt AB & Tiamat Energy ... Distributor; Industries Served. Energy; Automobile & Ground Transport;

Tokyo large mobile energy storage vehicle wholesaler

Packaging; Commercial; ... MEtER turns electric vehicles into grid resources. Our AI-powered algorithms offer you customizable optimization ...

Alongside corporate pledges on "low carbon petroleum" and transforming its refineries and centres into so-called "Carbon Neutral Transformation (CNX) Centers", and other adaptations of its core business, ...

These vehicles not only provide significant advantages in power supply and storage but also play a crucial role in promoting green energy and the development of smart transportation. As the EV market continues to grow, mobile energy storage vehicles will become an integral part of the future charging industry, further advancing the adoption of ...

Electric vehicles (EVs) are at the intersection of transportation systems and energy systems. The EV batteries, an increasingly prominent type of energy resource, are largely underutilized. We propose a new business model that monetizes underutilized EV batteries as mobile energy storage to significantly reduce the demand charge portion of many commercial and industrial ...

WATCHUNG, NJ, NOV. 11, 2021 - Power Edison, the leading developer and provider of utility-scale mobile energy storage solutions, is partnering with sustainability champion Hugo Neu Realty Management of New Jersey -and other stakeholders- to deploy the largest electric vehicle (EV) charging hub in the United States. This signature project --to be comprised of more than 200 ...

As a pioneer in energy storage technology, Changan Green Electric has been adhering to independent research and development and user needs as the core since its establishment, and is committed to making breakthroughs in ...

The subsidy covers up to 2 billion yen per project. A total of 12 projects totaling 180MW/595.3MWh was awarded 13 billion yen through Tokyo's FY2024 subsidy for promoting grid-scale battery storage, the metropolitan ...

NEW YORK & TOKYO, JAPAN - May 14, 2024 - Stonepeak, a leading alternative investment firm specializing in infrastructure and real assets, and CHC, a leading battery energy storage system ("BESS") project ...

Using an EV as a mobile energy storage vehicle turns an underutilized asset (car + battery) into one that helps solve several growing challenges with the power grid and provides a potential economic engine for the owner. Related Articles: EVs as Demand Response Vehicles for the Power Grid and Excess Clean Energy

Main Features; Intelligent Energy Storage: Off-peak energy storage combined with mobile charging for flexible, efficient, and continuous returns; Intelligent System: Autonomous driving system that, after the customer places an order via their phone, drives to the charging location and automatically returns to recharge;

Safe and reliable: Automotive-grade design ...

Power Edison, the leading developer and provider of utility-scale mobile energy storage solutions, has been contracted by a major U.S. utility to deliver the system this year. At more than three megawatts (3MW) and twelve megawatt-hours (12MWh) of capacity, it will be the world's largest mobile battery energy storage system.

ISO CTEEP claimed it as the first large-scale battery energy storage system (BESS) on Brazil's transmission grid. The project required a total US\$27 million investment. The transmission operator is permitted by regulations to earn up to US\$5 million revenues from the asset each year.

CATL, its CHC Japan partners and Shikoku Electric Power become the latest big names to spot the potential for a battery storage market in Japan: last week, Idemitsu Kosan, the country's biggest petroleum producer, announced its first lithium-ion (Li-ion) BESS project, preceded a few days before by utility Sala Energy ordering a 69.6MWh sodium ...

Regular readers of Energy-Storage.news may have read that Moixa is the vendor and creator of GridShare, an artificial intelligence (AI) platform for managing batteries, including in combination with home solar arrays. ... Following a launch event at the British Embassy in Tokyo, Moixa said the GridShare tech is now included in Smart Star as ...

Mobile energy storage vehicles fundamentally alter how renewable energy is harnessed and implemented within the electricity grid. By enabling the storage of excess energy produced during peak harvesting times, these vehicles significantly help in bridging the gap between production and consumption.

A full interview with Mahdi Behrangrad, head of energy storage at Pacifico Energy will be published on this site for Energy-Storage.news Premium subscribers in the coming days. Energy-Storage.news" publisher Solar Media ...

A total of 12 projects totaling 180MW/595.3MWh was awarded 13 billion yen through Tokyo's FY2024 subsidy for promoting grid-scale battery storage, the metropolitan government's document released in February 2025 ...
