Mexico's front-of-the-meter BESS market is practically nonexistent. BESS is not defined by law but rather by the market. Storage projects are forced to register as an active power plant ("central electrica") and be represented by a market participant, in this case, a generator (e.g., IPP). Hence, storage operators have to pay transmission ...

an uninterruptible power supply during outages until power resumes or diesel generators are turned on. In addition to replacing lead-acid batteries, lithium-ion BESS products can also be used to reduce reliance on less environmentally friendly diesel generators and can be integrated with renewable sources such as rooftop solar.
