

Uninterruptible power supply. An uninterruptible power supply (or uninterruptible power source; UPS) is an apparatus that provides electric power in an emergency when there is a problem with the normal electricity supply. It provides an almost instantaneous supply of electricity during any power failure. It is used normally to protect any sensitive hardware (computer, data ...

UPS (Uninterruptible Power Supply) significa sistema de alimentaci&#243;n ininterrumpida; el UPS es un dispositivo que suministra energ&#237;a de respaldo a los sistemas el&#233;ctricos cuando se producen cortes o fluctuaciones de energ&#237;a. El UPS ayuda a garantizar el funcionamiento ininterrumpido y a proteger los equipos sensibles contra potenciales da&#241;os.

Include all of the devices the UPS will need to support. If a piece of equipment has a redundant power supply, only count the wattage of ONE power supply. If you are unsure how many watts your equipment requires, consult the manufacturer or power supply specifications in the user manual. Here is an example of an equipment list to verify the load:
