A UPS, or a uninterruptible power supply, is a device used to backup a power supply to prevent devices and systems from power supply problems, such as a power failure or lightning strikes. A UPS can help prevent power supply problems that can often occur on a production site, such as an instantaneous voltage drop and a power failure.

The uninterruptible power supply (UPS) can vary in input or output ranges, and a fundamental choice between alternating current (ac) and direct current (dc) needs to be made. Emerson's UPS knowledge and offerings span the spectrum from mounting suggestions to communication options.
