

Uninterruptible Power Supply Purchase in Nigeria

Should you buy an uninterruptible power supply?

When load shedding occurs, the question of whether to buy an uninterruptible power supply (UPS) becomes a popular topic among consumers and small businesses. However, if you've attempted to purchase a UPS, you may have encountered technical terms and hardware features that are confusing.

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) is a device that keeps your computer running for a short period of time even after the primary power source is lost. It also provides protection from power surges. However, UPS isn't only restricted to computers, it can also be used with other devices like your TV set.

Which is the best ups in Nigeria?

These include the likes of the Mercury UPS range which is widely used in Nigeria and known for its stable performance. Also, there is the Bluegate UPS range which can be trusted when it comes to uninterrupted power supply whether you are at home or in the office. Other brands include the popular Binatone, Maxtron, Vectronic and the Mercury Elite.

What is erratic power supply in Nigeria?

Erratic power supply in Nigeria is a long-standing issue, not a recent development. It can be traced back to the years before independence, particularly in 1950, with the establishment of the Electricity Corporation of Nigeria (ECN). The corporation was characterized by isolated generation facilities and low power generation.

What is a ups power supply & how does it work?

Our UPS power supply provides protection from power surges, load shedding and unpredictable weather conditions. Uninterruptible Power Supply (UPS) ensures its internal battery gets constantly charged from the main electrical grid supply and delivers a steady, consistent electricity flow to any equipment or appliance plugged into it.

The "Best" level of UPS technology, Online battery backup systems provide the highest quality of power protection by incorporating double-conversion technology, whereby power coming into the UPS is converted from AC to DC. Power is then conditioned and converted back to AC at the output of the UPS. Online UPSs eliminates the need to transfer or switch since power runs ...
