

Victoria Power Lithium Battery Pack

What types of lithium batteries does victron energy offer?

Victron Energy offers 3 models of Lithium batteries. Peak Power Pack- The Peak Power Pack is a complete substitute for heavy lead acid batteries in applications where high currents occur for a short time.

What is a victron 24v battery?

The Victron 24V (25.6V) 300Ah Smart NG LiFePO₄ Lithium Battery is the latest innovation in energy storage technology, designed to meet the demands of high-performance energy systems. Featuring advanced Lithium Iron Phosphate (LiFePO₄ or LFP) chemistry, this battery delivers exceptional efficiency, reliability, and durability.

How many batteries can a victron smart lithium battery store?

Victron Smart Lithium batteries can be connected in series, parallel and series/parallel so that a battery bank can be built for system voltages of 12V, 24V or 48V. The maximum number of batteries in one system is 20, which results in a maximum energy storage of:

What is a lithium battery pack?

Immerse yourself in the future of power with high-performing lithium battery packs. Utilizing state-of-the-art lithium-ion technology, these battery packs offer superior energy density, cycle life, and power output. Perfect for outdoor exploration or a dependable power source for off-grid living, our lithium battery packs redefine power efficiency.

What is a victron lithium ng battery?

The Victron Lithium NG battery features mounting brackets for secure and easy installation, ensuring stability even in mobile or challenging environments. Don't compromise on power or reliability.

Why should you choose victron smart lithium batteries?

The Smart range also offers high continuous current discharge rates so suitable for more extensive inverter requirements. Victron Smart Lithium batteries can be connected in series, parallel and series/parallel so that a battery bank can be built for system voltages of 12V, 24V or 48V.

Our biggest selling RV power plant. The lightest, smallest, best performing in the Australian market. At nearly 100% efficient, they can charge up to 30% faster than other batteries. We can assist with configuring your system to suit ...

Victron Energy's recently introduced Lithium SuperPack range comes in the following capacities and voltages: 12.8V & 25.6V Lithium SuperPack batteries: These SuperPacks will give you 2,500 cycles to 80% depth of ...

Victoria Power Lithium Battery Pack

A lithium-ion battery pack with intrinsically safe LiFePO₄ cells, a built-in charger, and suitable for high discharge currents. Nominal voltage: 12.8V Battery capacity: 8Ah to 40Ah(not suitable for ...
