

Will Vilnius have a new heat and power plant?

A new combined heat and power plant in Vilnius will be able to produce about 40% of the heat centrally supplied to Vilnius. The remaining heat demand would be met by other independent heat producers and a heat supplier.

How many MW will Vilnius Power Plant have?

The total electrical capacity of the power plant will be about 100 MW and the thermal capacity will be about 240 MW. Vilnius combined heat and power plant has been planned taking into account the heat demand in the capital and the situation in the waste and biofuel market.

Which power plants are owned by Ignitis Gamyba?

The company operates the Lithuania's largest electricity generation facilities: Elektrenai Complex, Kruonis Pumped Storage Hydroelectric Power Plant, Kaunas Hydro Power Plant (KHPP) and Vilnius Power Plant-3. The electricity generated in power plants owned by Ignitis Gamyba is traded on the international Nord Pool power market.
