

Vilnius generator container

What is a Vilnius aerosol generator?

CH Technologies' Vilnius Aerosol Generator is a general purpose dry powder disperser that uses a semi-fluidized bed system that allows outputs of aerosol dust concentrations from 1 to 2500 mg/m³. The VAG utilizes optical feedback control to provide a constant output concentration to provide a stable mass flow of powder.

What are containerized generator / packaged container and enclosure options?

Containerized generator /Packaged container and enclosure options provide alternatives to installations in existing or new buildings. We have significant experience with pre-packaged container and enclosure solutions for engine-generator sets, balance of plant equipment, and switchgear.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.

Why should you choose genset containers?

With our genset containers offer optimal performance in various site conditions. By maintaining high-quality standards for both the engine and the complete containerized power plant package, we ensure excellent reliability for your power and heat generation needs. Easy to install and disassemble, convenient for maintenance and inspection.

What is a Tier 4 containerized generator?
