

Aiming at these problems, this paper proposes a improvement scheme of uninterruptible power supply by adding a small diesel generator set with self starting function as the standby power supply. And it improved the control circuit, which can automatically switch to the diesel generator in case of dual power supply failure, so as to reduce the cooling system ...

Since more than 45 years, Statron is THE partner for uninterruptable power supply (UPS) solutions and battery systems. More than 30,000 UPS and battery systems have been successfully delivered, installed and are in operation at ...

An uninterruptible power supply (UPS) helps prevent sudden shutdowns, data loss, and hardware damage by providing backup power when your main electricity fails. For home users, a UPS can protect desktop PCs, gaming consoles, and smart home devices from unexpected power cuts. In business settings, it ensures servers, network equipment, and ...

Protect sensitive electronics and equipment during power surges and blackouts with a UPS System or Uninterruptible Power Supply from our extensive UPS lineup of standby, line-interactive, and double-conversion models. Battery backup capacities range from 350 VA to 50,000 VA. Key features include sine wave output, energy-saving Green Power ...
